Login using
a private
key

Choose a passphrase to encrypt your private key

Enter passphrase

Repeat passphrase

Generate keys

You must save and backup the keys shown next. If you lose them, you lose access to your assets. You can click the "Save key" button to save the encrypted key on your mobile device. Note that a rooted or jailbroken phone can pose a risk to your keys. Verify that you can log in to the account and see the correct public address before sending anything to public address to be shown!
